DevaJal®

Water Vortex DevaJal®

Simple, efficient and very economic water energizer. We find the spiral movement in nature and also in the universe where there is always movement or growth. This can also be observed in the natural flow of water, the blood, the lymph system, etc.

The well-known water researcher Viktor Schauberger defined those downward tapering spiral movements of the water swirls as implosion power. Disharmonious information is deleted by this implosion power in the water. The ability of water to be in resonance with harmonious information from the earth and the cosmos is increased. The water is ready again to accept and store harmonizing and strengthening information.

The DevaJal® is a simple pipe part with two threads and a hole in the centre. While moving the water from one bottle into the other, a natural eddy is developed, which energizes the water and makes it more absorptive for information. Additionally in accordance with the research by Masaru Emoto, the DevaJal® holds imprinted the words "love and gratitude" in different languages thus giving the water additional good information. The DevaJal® is easy and handy and can be taken away everywhere problem-free in the handbag or jacket pocket. The results are amazing, especially, if you consider how simple, economical and practical the DevaJal® are. Each DevaJal® comes with a handy, beautifully arranged folder in which the work of Masaru Emoto (the message of the water) and Batmanghelidj (water the healthy solution) is introduced.

DevaJal® inclusive folder

CHF 17,00

(Fr. -,50 per swirl are donated to the favour of the water research to the Emoto laboratory in Liechtenstein -- see also:
